Tuck Pockets

Add \$40 for Tuck Pocket over
shoulder. Otherwise Velcro is standard.

Measuring Guide

Note: All measurements are in inches and pounds. Please measure over the clothing you'll be wearing while jumping (i.e. weight vest, jumpsuit).

HEIGHT: (inches) Remove shoes, and stand straight up with feet shoulder width apart.

WEIGHT: (in pounds) Body weight with clothing.

INSEAM: (inches) Remove shoes, and stand straight up with feet shoulder width apart. Place the beginning on the tap measure high in the crotch (at the point as snug pair of jeans crotch seam intersection would be). Follow the inside of the leg to the floor.

CHEST/BUST: (inches) **Men** Place measuring tape over the nipples with arms at the side. **Women** For the chest measurement place the tape under the breasts with arms at the side. For the bust measurement place the tape over the nipples with arms at the side.

WAIST: (inches) Place the measuring tape over the belly button. Do not suck in your gut! (Be sure you are wearing your normal skydiving clothing.)

THIGH (Leg Strap): (inches) Measure straight around the thickest part of the thigh, horizontal to the ground.

BACK (C-7 to L-4): (inches) C-7 is the lower portion of your neck where the yoke of the containers sits. L-4 is the curved, lower part of your back where the bottom of the container rests.

SHOULDER WIDTH: (inches) While wearing a t-shirt that fits, measure from the sleeve seam straight across the back to the other sleeve seam.
